VISIONING A SUSTAINABLE FUTURE

6-10 MARCH 2006 TOWNSVILLE
JUPITERS TOWNSVILLE HOTEL & CASINO

In conjunction with:

Supported by:

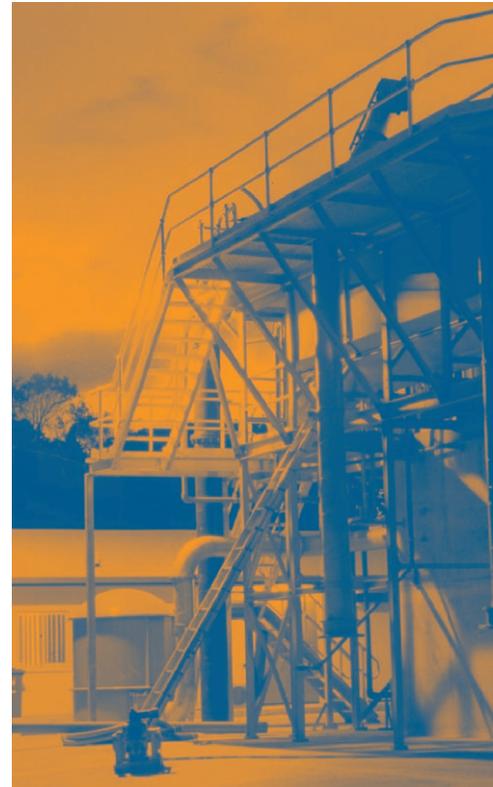

Townsville City Council promoting A Centre for Excellence in Tropical Design presents an exciting and innovative event that is a must for current and aspiring engineers and those interested in creating a sustainable future.

Combining a conference component with a professional development course, Student Workshops and forums for students in Years 9-12, this event will actively challenge and engage attendees to identify and vision practical steps and strategies to support sustainability in the tropics.

PROGRAM OF EVENTS:

- 6 MARCH** Introduction to Sustainable Engineering – a one day professional course for engineers (conducted by The Natural Edge Project).
- 7 MARCH** Conference Session – Engineers Visioning the Future.
- 8 MARCH** Conference Session – Total Water Management.
- 7- 8 MARCH** Forums for Years 9-11 students to develop awareness of a sustainable engineering and improving sustainability in the tropics.
- 9 MARCH** Sustainable Change Agents – a half-day workshops for Year 12 and first year engineering university students.
- 10 MARCH** Tour Day (engineers in action)
